Nuvo Group Releases Ritmo Advanced Pregnancy Sound

0 Comments | [Wireless News, Jan 19, 2010](#)

Nuvo Group USA announced the release of the Ritmo Advanced Pregnancy Sound System which delivers safe sound to prenatal listeners.

According to Nuvo, Ritmo was created to provide a way for families to share the sensory and emotional experience of bonding through sound and music with their developing baby. Ritmo can connect to most audio devices with a universal stereo plug such as iPods, iPhones, MP3 players and Blackberries.

An expectant mother's audio player plugs into the controller which utilizes Nuvo's Safe and Sound Technology to regulate output to a safe level for a baby to hear in-utero, regardless of how loud the sound was recorded or the volume that it is played.
