## [Nuvo Ritmo Pregnancy Sound System – Prenatal Bonding Through Sound and Music](#)

by [phoebz](#) on Jan 17 at 11:35 am

Do you know that at 17 weeks from conception an unborn baby can already hear? That's true. So if you or someone you know has a baby on the way, then you have to note that singing and playing music can be a soothing and pleasant experience for both the mommy and the baby.

In the past, what most mommies do to let their unborn child listen to music is that they place earphones or headphones near their tummy. Now, this does not have to be the case. Because Nuvo, a

group of full-time parents who creates a product line of smart, tech-y toys, introduced a new gadget especially designed for moms- and babies-to-be – the Ritmo Pregnancy Sound System.

The Ritmo Pregnancy Sound System is designed to look like a soft fabric belt but functions as a complete prenatal music player. It features acoustic technology and two separate stereo speaker so that wherever your baby is inside the womb, it can enjoy high quality sound in a balanced and effective way. Whether you play classical music for the calming Mozart effect or classic rock of the Beatles, this device will sure let you and your baby bond through sound and music like no other.

But wait, there’s more! The Ritmo Pregnancy Sound System also allows your unborn to recognize sound as early as 17 weeks. Just record grandparents talking, siblings singing a lullaby, birds chirping, and daddy reading a book. Let baby listen to all these sounds because studies show that babies remember and prefer sounds they heard prior to delivery.

The [Nuvo Ritmo Pregnancy Sound System, Black/Green](#) is really one amazing product! It makes a perfect gadget gift for yourself and for someone you know, so get one now!
