

# Baby Womb Music - Nuvo Ritmo Pregnancy Sound System by Oren Oz 77

By [Susana S](#)

## A Revolutionary Sound System for Unborn Babies

Since the late 1990's more and more pregnant women have been playing music to their unborn babies in the womb, but it isn't until now that you have been able to do so, so comfortably and stylishly. Previously if we wanted to play music to our growing babies in the womb, we had to sit very still and fumble awkwardly with bulky speakers.

The Nuvo Ritmo Pregnancy Sound System created by Oren Oz, is a revolution for moms to be that want to play womb music to their developing babies, because it fits so snugly and comfortably on our growing tummies, as well as ensuring that the music is played at optimal fetal levels.

The auditory system forms extremely early in fetal development and the ear is actually the first sensory organ to develop brain connections. From 5 months gestation your babies' ears are fully developed and you will notice their movements and responses to the sounds that they can hear.

### Playing calming baby womb music has so many benefits including:

- relaxation and confidence in your baby after birth
- enable strong bonding for mother and child through music
- intellectual development for your baby
- enhanced emotional development
- improved sensory development

As well as having so many benefits for your babies development, I'm sure you'll agree that the pregnancy sound system looks great as well. It's made of super comfy, soft spandex, is machine washable (but do take out the speakers first!) and fits the contours of your growing body perfectly. Its soft fabric belt is lightweight, elasticized and supportive. Wear it under your clothes while you're walking the dog, at work or pottering around doing housework. It allows you the freedom to wear it no matter what you are doing or wherever you are.

The Nuvo Ritmo easily attaches to your iPod or other MP3 player (there is a pocket where it fits in securely) and it has a battery life of around 5 hours, which is plenty of time to play a few Mozart Concerto's plus some of your own favorites.

### Why Buy the Nuvo Ritmo Sound System?

The Nuvo Ritmo Pregnancy Sound System has some very high tech features to make the experience of sharing music with your baby as enjoyable and as safe as can be.

- Speakers automatically adjust volume to optimal fetal levels
- Totally hands free
- Share the emotional and bonding experience of listening together
- Rechargeable Battery
- Plug your iPod or MP3 player into the Ritmo audio controller
- Special side pockets in the belt hold your MP3 player and the audio controller

Amazon.com - the world's most trusted online retailer, is offering the Pregnancy Sound System at well below what you would pay for it elsewhere.

List Price: \$149.99

## Womb Music - Mozart, Bach, Beethoven

There's evidence that playing classical music such as Mozart, Bach and Beethoven can produce a calming effect on your unborn baby

[hubpages.com/.../Nuvo-Ritmo-Pregnanc...](http://hubpages.com/.../Nuvo-Ritmo-Pregnanc...)

as well as improve your babies' IQ, but your baby will enjoy and respond to, any type of music from around 17 weeks gestation. You may want to go easy on the thrash metal and gangster rap though and choose music with more uplifting tones, because research shows that babies will remember their womb music for up to a year after birth and chaotic or discordant type music can have some negative effects.

The CD's below are specifically created for perinatal listening and infants in the first year of life.

Mozart for Mothers-To-Be: Tender Lullabies for Mother and Child

Price: \$3.37  
List Price: \$7.98

Build Your Baby's Brain

Price: \$4.79  
List Price: \$7.98

UltraSound - Music for the Unborn Child

Price: \$5.54  
List Price: \$8.98

Beethoven for Babies

Price: \$3.13  
List Price: \$7.98

### iPods for Your Pregnancy Sound System

If you don't have an iPod or MP3 player to use with your pregnancy sound system here are a couple of very well priced players. The 8G iPod nano stores up to 2,000 songs for easy accessibility to your favorite music for you and baby. The iPod shuffle shown here can store 240 songs and has much better reviews than the newer 4th Generation iPod shuffle.

Whichever MP3 player you choose to buy, it will fit snugly into the pregnancy sound system belt, allowing you to get on happily with whatever you are doing.

Apple iPod nano 8 GB Pink (5th Generation) NEWEST MODEL

Price: \$131.00  
List Price: \$149.99

Apple iPod shuffle 1 GB Silver (2nd Generation) OLD MODEL

Price: \$92.98  
List Price: \$49.00

### Thank You Oren Oz!

Without Oren Oz seeing his pregnant wife struggle with convectional music players while trying to play music to their unborn baby the product would never have been developed. "Ritmo was born out of my frustration at seeing my wife struggle to find a comfortable position that also allowed the speakers to stay still."

Well all I can say is - "Good Job Oren!" You've created a great product that many women are just going to love and their babies are going to love it too - thank you!

The Nuvo Ritmo Pregnancy Sound System is truly inspired and inspiring for us moms that want to play our babies music in the womb - it's a great product and I for one am looking forward to trying out future Ritmo applications for the crib, stroller and toys when they become available. My babies absolutely love music and I think Oren Oz has hit on something that's going to become more and popular in the next few years.
