Nuvo Group USA, announces the release of the Ritmo™ Advanced Pregnancy Sound System, which delivers unparalleled quality and safe sound to prenatal listeners.

Ritmo was created to provide a convenient, comfortable and safe way for families to share the sensory and emotional experience of bonding through sound and music with their developing [baby](#).

Ritmo can connect to most audio devices with a universal stereo plug—such as iPods, MP3 players, iPhones and Blackberries. Here’s how it works...

The expectant mother wears a fashionable, lightweight belt around her pregnant belly. The belt has four speakers and a controller, the size of a deck of cards, which fits comfortably into a tiny pocket.

Your own audio player plugs into the controller, which utilizes Nuvo’s patented Safe & Sound Technology to

[Research](#) shows that reactive listening begins at 17 weeks gestation. Often referred to as the Mozart Effect, numerous studies show that music contributes positively to human [fetal development](#), bonding and [stress](#) reduction.

But with Ritmo, the type of sound that can be delivered in-utero has expanded way beyond music.

Using Ritmo, a baby in the womb can hear a recording of:

dad reading his favorite book

siblings talking or singing

grandparents singing a lullaby

the family dog barking

and, yes... even someone talking to him/her on a phone from miles away.

When the family isn't taking turns using Ritmo to bond with baby, the mom-to-be will love how easily Ritmo fits into her active lifestyle. Whether practicing yoga, walking the dog, working or simply relaxing, Ritmo's soft state-of-the-art fabric belt is lightweight, elasticized, supportive, washable and irritation-free.

"My Ritmo is so comfortable I wear it when I'm cleaning house, watching TV, or even reading a book," says Tara Meussling. "I am a big fan of the Temptations so I play them on my Ritmo so my baby can enjoy it too. When he starts moving, I know it's working!"

Post-pregnancy, Ritmo will continue to adapt to children's' changing environments and needs, with [applications](#) for the crib, stroller and toys all coming soon.
